

Individual Savings Account (ISA)

Individual Savings Account

What is it?

Anyone, who is an income tax payer and has some money to save or invest, should know about Individual Savings Accounts (ISAs). ISAs are wrappers within which a wide range of savings and investment products can be held, free of UK income and capital gains tax by anyone aged 18 or over (16 or over for cash ISAs).

ISAs serve as a 'wrapper' to fully protect savings from tax, allowing individuals to invest monies up to maximum limits (by way of regular or single amounts) each tax year in a range of savings and investments and pay no personal tax at all on the income and/or profits received.

The main ISA benefits are:

- No personal tax (income or capital gains) on any investments held within an ISA
- Income and gains from ISAs do not need to be included in tax returns
- Money can be withdrawn from an ISA at any time without losing the tax breaks

There are four types of ISA:

1. Stocks & shares

These are in the form of either individual shares or bonds, or pooled investments such as open-ended investment funds, investment trusts or life assurance investments.

2. Cash

These are usually contained in a bank or building society savings account.

3. Innovative Finance (IF-ISA)

These are in the form of loans made through peer-to-peer (P2P) platforms.

4. Lifetime (LISA)

These are for those aged between 18 and 40 to help save them up for their first home or retirement.

Plus the Help to Buy ISA (which is a type of cash ISA and no longer available to new subscribers)

These are aimed at helping first time buyers to save for their mortgage deposit. Closed to new accounts on 30 November 2019 but savings can

continue into existing plans until November 2029. It is not possible to subscribe to both a cash and a Help to Buy ISA in the same tax year

All of your annual allowance can be invested in either stocks & shares, cash (including Help to Buy if applicable), innovative finance ISAs or lifetime ISAs, or you can split it between more than one type, up to the overall annual limit of £20,000 with either the same or a different provider. However, the maximum annual amount you can save in a lifetime ISA is £4,000 (and up to £200 per calendar month for the Help to Buy for those who hold one).

You will also be able to transfer money saved in previous years' cash ISA holdings to stocks & shares ISAs and vice versa without affecting your current year's annual allowance. Innovative Finance ISAs can only be transferred to other ISA wrappers once outstanding loans have been repaid as cash, it is also possible to transfer existing ISA funds into IF-ISAs.

Stakeholder standard ISAs

Stakeholder standard ISAs are those which meet Government guidelines regarding cost, access and terms. Cash and Stocks & Shares ISAs can qualify for a Stakeholder standard. The cost limit varies with each investment type and the access and terms criteria specify that investors must be able to get their money back at any time without penalty and with no other restrictions. The ISA must also offer low minimum investment limits and can only invest a maximum of 60% in equities and property, with the remaining 40% in less volatile assets such as bonds and cash.

Because of these limits, Stakeholder standard Stocks & Shares ISAs are designed to meet the needs of a wide range of investors. For this reason, they may be less appealing to experienced investors who want to maximise their long-term growth potential and are therefore more likely to seek specialist funds.

The presence or absence of a Stakeholder standard cannot predict whether an ISA will prove to be a good or bad investment. A Stakeholder standard ISA has not received Government approval of any kind, nor is your money or investment return guaranteed by the Government in any way.

Eligibility

To be eligible to invest in an ISA, an investor must be an individual (i.e. not a company or trustee) who is 18 years of age or over (except that 16 and 17 year olds

are able to invest up to £20,000 in a cash ISA) and who is resident in the UK (or is a Crown servant serving overseas or the spouse of such an individual who accompanies their spouse abroad).

When an individual ceases to be eligible to invest in an ISA, any existing ISAs will continue to be exempt from UK tax, but future contributions to regular investment ISAs must be terminated and no further single contributions may be made.

Each individual may effect a stocks & shares, a cash, an innovative finance ISA and /or a lifetime ISA each tax year (subject to prescribed limits). A husband and wife and civil partners are treated as separate individuals so that although joint ownership of an ISA is prohibited, each may fully subscribe to ISAs in their own name.

Contribution limits

The current ISA overall maximum annual contribution limit is £20,000.

Taxation

Any investment returns received from an ISA will be tax free.

There is no personal tax on any income taken and no capital gains tax on any gains made.

The value of your ISAs will be included in your estate for Inheritance Tax purposes on your death (except ISAs invested in shares listed on alternative investment markets that may qualify for Business Relief).

On death

If an ISA saver in a marriage or civil partnership dies, on their death, their surviving spouse or civil partner will inherit their ISA tax advantages and will be able to invest an additional amount in their own name equal to the value of the deceased's ISAs, on top of their usual allowance.

The value of the inherited ISA allowance will normally be the higher of the total value of the ISA savings at the date of death or the value on the date the ISA savings stopped being exempt from UK Income Tax.

ISA savings stop being exempt from UK Income Tax when the first of the following occurs:

- The administration of the estate is completed
- The account is closed or

- Three years after death

So, if an ISA holder were to die, leaving an ISA valued at £30,000 at the date of their death or when the ISA savings stopped being exempt, their spouse / civil partner is entitled to an additional ISA allowance of £30,000. Where a cash subscription is paid, the spouse / civil partner has 3 years from the date of death to use this or if later, 180 days from the completion of the administration of the estate, and it can be paid in addition to their ISA allowance (currently £20,000).

Where the ISA assets are left to someone else in the will or are used to meet expenses from the estate, the spouse / civil partner is still entitled to the additional allowance and this cannot be claimed by anyone else even if they received assets from the ISA.

The surviving spouse / civil partner can use the additional allowance to top up an existing ISA or open a new ISA with an ISA manager of their choice.

The subscriptions can be made to either a cash or stocks & shares ISA, in cash or the inherited non-cash ISA assets.

The claim must be made within three years of the date of death or if later, 180 days from the completion of the administration of the estate, for subscriptions in cash and within 180 days of beneficial ownership passing to the surviving spouse / civil partner for 'in specie' subscriptions.

All statements concerning the tax treatment of products and their benefits are based on our understanding of current tax law and HM Revenue and Customs' practice. Levels and bases of tax relief are subject to change.

Withdrawals

You can withdraw cash or assets held in ISAs at any time and there is no minimum length of time you need to hold them first. All withdrawals are free of tax.

You can withdraw either some or all of your investment. Since 6 April 2016 it is possible for cash to be withdrawn from a cash ISA or any cash held in a stocks & shares or Innovative Finance ISA (including from the sale of investments) and up to that amount can be reinvested in ISAs in the same tax year without the replaced funds counting towards the annual ISA subscription limit. Withdrawals of current year subscriptions can effectively be replaced in any current year ISA, but cannot breach the 'one ISA of

each type per tax year' rule. This facility requires the ISA Manager to have adopted the 'Flexible ISA' rules.

ISA risk considerations

There are a number of risk considerations that need to be taken into account. It is important that you are aware of these.

- Governments can and do change the rules on tax efficient vehicles, like ISAs.
- An ISA is not a risk free product and the value of the ISA investment may be at risk due to the investments held within the wrapper.
- ISAs can grow but depending on market conditions, you may not realise the initial sum invested. There is no guarantee that you will get more out of an ISA investment than you have paid in.
- Income generated from investments held in ISAs is variable and is not guaranteed.
- If income taken:
 - The capital value of the fund may be eroded if withdrawals taken exceed the net growth of the fund
 - The level of income provided / required may not be sustainable
- If you leave the UK and are no longer a UK resident you can keep the ISA investment with its tax advantages but can't make any new contributions to the ISA.
- ISA investments are liable to Inheritance Tax on death (except those eligible for Business Relief). Income Tax deducted at source on foreign dividends may be recoverable. There are no further Income Taxes to be paid on investments held within an ISA.
- Past performance is no guarantee of future returns.
- If growth is low, charges may eat into the capital invested.
- The price of units and the income from them can fall as well as rise.
- Please be aware that there may be occasions when an individual fund or funds may have a higher risk rating than your overall stated attitude to risk. If this is the case, then the overall risk rating applied to all of the combined funds being recommended is still designed to meet your stated tolerance.
